

SHARK 700 EXPERT

SHARK EXPERT is the combination of the SHARK sawing machine with a wide conveyor belt with three hydraulic extensions. Because it has three extensions, SHARK EXPERT can benefit from the aid of a 5-metre belt, which when folded away makes it very compact and space-saving. The 40cm wide conveyor help to effortlessly transport the logs after cutting. The conveyor extends is hydraulic and has metal paddles and interchangeable PVC belt sections.
